

## JOB DESCRIPTION

<b>Title of Position</b>	<b>Front End User Experience Engineer</b>
<b>Department</b>	<b>R&amp;D</b>
<b>Immediate Supervisor</b>	<b>Director R&amp;D</b>
<b>Location</b>	<b>Blainville</b>

### Summary of the Role:

Hitachi Systems Security R&D Engineering department is seeking an experienced, creative and passionate Front-End developer to build on our next generation Cyber Security Analytics platform. The right person for the job will be enthusiastic and knowledgeable about distributed systems, web services and user experience. Their job will involve working with multiple internal stakeholders to define and execute on the project plans for our next generation evaluation services.

The ideal candidate is a brilliant problem solver, quick learner, self-starter, and excellent communicator with a passion for shipping quality products. Ability to deliver results in a fast-paced environment is a must.

From brainstorming through development to deployment you'll be working on challenging projects with a goal oriented team to deliver on what's needed for Hitachi Systems Security's success.

### Primary Responsibilities:

- User experience design, front-end development, and Enhancement of our security platform
- Work with product managers to understand our users and strategically lead product decisions
- Improvise existing codebase.
- Improve the User Interface and the User Experience of the platform.
- Brainstorm User Behavior to develop a quality product

### Required Qualifications and Experience:

- Bachelor's Degree in Computer Science or a related technical field or equivalent work experience – a degree or certification in design is a plus.
- 3 years of experience with software engineering and development
- 3 years of experience with HTML5, CSS3, JavaScript
- Portfolio or collection of past work a must.
- Candidates must be legally eligible to work in Canada

### Skills:

- Strong knowledge and expertise in **Angular 2+**

- Experience with **Typescript** is plus.
- Experience with dashboard design is a plus.
- Proven skills in UI design.
- Strong focus on user experience - working from wireframes through to final product.
- Fully capable of working with flows and wireframes and thinking through the entire user experience.
- Experience establishing the best usability practices and championing them.
- Experience developing technically precise design specifications and working with the Developers to ensure pixel perfect execution.
- An uncompromising dream for excellence a huge plus.
- A real passion for clean and elegant design an absolute must.
- Very strong familiarity UX standard methodologies for multiple platforms.
- Experience and ability to incorporate feedback iteratively from stakeholders.
- You have the ability to develop a strong empathy towards the end user.
- Strong communication skills & a standout colleague – can work closely with PM and Dev to ensure the best possible product and end-to-end experience for our customers, even if that means on occasion going toe-to-toe with Dev leaders and Product Managers.

#### **We offer:**

- Thorough in-house, expert training on cutting-edge technology
- State-of-the-art IT equipment
- Friendly and dynamic work environment in new and modern office
- Employee Referral Bonus
- Group insurance plan
- Team spirit and dedication to service excellence
- Sense of belonging to a global, brand-name organization
